(54) Title: DISEASE MANAGEMENT SYSTEM

(57) Abstract: A comprehensive disease management system providing advanced diagnostic, prognostic and therapeutic capabilities to healthcare workers located in remote, rural and resource-poor urban centers is disclosed. Additionally, a method of managing disease in a patient located remotely relative to interpretation and therapeutic dispensing services is provided including methods of data collection, data interpretation and therapeutic dispensing. An algorithm is disclosed to provide non-physician healthcare workers in remote, rural and resource-poor urban centers to manage disease in patients with human immunodeficiency virus (HIV) disease.
